DETAILED ACTION

Remarks

This communication is responsive to the amendments and response filed on ~~October 8~~, 2004. Claims 1-2, and 5-14 are currently presented for examination.

Allowable Subject Matter

1. Claims 1-2 and 5-14, after further consideration and search, are allowed over the prior art.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a method that uses theming functions of a theme manager to render graphical components in a themed fashion. The method is to provide a system that uses a different graphical component library, either theme-aware or theme-independent, as appropriate depending on the nature of each rendering request.

The prior art of record, particularly, the Johnson, Jr. reference (US 6243102 or 6104391 or 5959624 or 6239795) teaches systems and methods for providing a user with increased flexibility and control over the appearance and behavior of objects on a user interface by grouping objects into themes to provide the user with a distinct overall impression of the interface, and switching the themes dynamically by switching pointers to drawing procedures (see abstract's and col. 17, lines 21-67 and col. 29, lines 33-54

Art Unit: 2676

of the US 6243102 patent). However, Johnson fails to teach issuing, by the graphical component library in response to receiving a theme-independent graphical component render request from an application, a rendering service request for a graphical component, the request including at least one component defining parameter and a theme handle, the theme handle being a reference to a predetermined set of appearance characteristics stored in an internal data structure accessible to the appearance manager (claim 1), and rendering, by the appearance manager, the theme-independent graphical component render request in accordance with the theme handle (as in claim 10). Accordingly, claims 1-2 and 5-14 of the instant application are allowed over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
